

Angle Iron Cover

A vinyl solution to an ironclad problem.

Easy to Install!

The vinyl Angle Iron Cover is easy to work with and simple to install. The Angle Iron Cover is made of flexible, lightweight vinyl making it easy to handle and cut.

- Simply cut the Angle Iron Cover to match the length of the angle iron using aviation snips, large cutters or a utility knife.
- Slip Angle Iron Cover onto angle iron.
- Spray vinyl surface with lubricant (WD-40, for example) for easy cleaning after installation, and to allow for expansion and contraction.
- Install angle iron during masonry construction.
