

Grout Stop[™]

Product Description

Dimension

- 6" for 8" CMU X 100' Rolls
- 10" for 12" CMU X 100' Rolls

Finish

- Polypropylene, clear mesh

Uses

- Grout Stop creates a barrier that stops the flow of grout when filling block wall cells. This is an effective way to limit solid grouting to upper block courses.

Advantages

- Durability prevents grout from breaking through
- Allows moisture to pass during construction
- Lightweight and economical
