

PEA STONE Material Guide

Material: Natural Gravel

Product: Pea Gravel (GR) – Commercial

Applications: Filter Gravel

Description: An open graded coarse aggregate, produced by washing and screening natural gravel. They are formed by the natural disintegration of numerous types and colors of rocks by glacial or riverbed action into primarily round particles.

Material Properties: Commercial

Pea Gravel is produced to commercial requirements

Physical Properties:

- 2002 Crushed Particles – 39%
- Loose Weight (Last test) – 99.6 lbs/cu.ft. (1595.4 kg/m³)
- Rodded Unit Weight (Last test) – 105.0 lbs/cu.ft. (1681.9 kg/m³)

General Usage Guide:

The Pea Gravel should be placed into the prepared area as shown in the design plans.
