

Metal Drip Edge Flashing

Stainless Steel

Stock Profile

FS1010

3"

Hemmed Drip Edges

(use in conjunction with other membrane or laminated flashings)

Product Description

Dimension:

□ 28 gauge (.015) x standard 10'-0" lengths.

Finish:

▪ Metal - Type 304 / 2D ASTM A 167 & ASTM A 240

Uses:

▪ Thru-Wall Flashing

Advantages:

- Durability, not prone to tears or punctures
- Very long life
- Hemmed drip edges deflect downward migrating water away from the building
- Hemmed drip edges form safe, clean aesthetically attractive lines
- Separate hemmed drip edge piece can supplement the performance of membrane and laminated copper flashing

Note: Seam minimum 4" laps with two beads of Lap Rite™ non-skinning butyl metal flashing sealant.
