## **Leeds Statement**

04/07/08

The dollar value of Thru-Wall Flashing in a building project usually limits its participation in Leeds calculations.

**Material** – Hyload Flashing System (membranes & preformed shapes)

**Pre-consumer Recycle** - The Hyload Flashing Membranes have 0.5% (by weight) recycled PVC and polyester fibers obtained from used conveyor belting.

**Post Consumer Recycle** – The Hyload Flashing Membrane are 100% recyclable if returned to the manufacture. The Surface Adhered membranes are not.

**VOC Requirements** – The Hyload Flashing Membrane has no VOC content.

**Manufacture Location** – Wadsworth, OH 44281

**Extraction Site** – Numerous suppliers within 376 miles.

### **Other Green Processes**

In the winter Hyload's plant is heated by the membrane manufacturing process. In the summer it is recycled into the manufacturing process.

Water used in the manufacturing process is a self contained system.

Best regards,

William T. Foltz  
Sales & Market Manager  
Hyload, Inc.
