## LEED Statement

**Material** – Hyload Membranes

**Pre-consumer Recycle** - Hyload Membranes has 0.5% (by weight) recycled PVC and polyester fibers obtained from used conveyor belting.

**Post-Consumer Recycle** – The Hyload Membranes are 100% recyclable if returned to the manufacturer. The self-adhering membranes are not.

**VOC Requirements** – Hyload Membranes have no VOC content.

**Manufacture Location** – Wadsworth, OH 44281

**Extraction Site** – 66% Extracted within 50 miles

**Other Green Processes** In the winter Hyload's plant is heated by the membrane manufacturing process. In the summer it is recycled into the manufacturing process. Water used in the manufacturing process is a self-contained system.

Best regards,

A handwritten signature in blue ink, appearing to read 'Dave Afanador', written over a light blue circular stamp.

Dave Afanador  
Business Development Manager
