MASON PRONET™ DT

Commercial & Residential Cavity Wall Construction

Product Information:

Uses:

- Used in traditional masonry, steel and wood stud cavity wall construction.
- ProNet™ DT is placed directly on top of flashing at base of wall, above doors, windows and other openings and flashed areas.
- ProNet™ DT is a 90% open weave mesh design and will not oxidize, rot, promote mold or fungus, or react with other common building materials.

Recycled polyester material; 17% post-consumer and 33% pre-consumer.

Sizes: All sizes come in 10" high x 5' lengths

☐ 0.4"   ☐ 1"

☐ 1-1/2"   ☐ 2"

Install:

- After laying one or two courses of brick, place a continuous row of ProNet™ DT in cavity or collar joint on flashing against inside of outer wythe.
